## Introduction

PART 14 lists all registrations made in class N for the period covered by this issue. An index of names and titles associated with the work is followed by the main entries, listed in order by registration number. Filing of the index is letter by letter, except in the case of inverted names which are filed up to the comma or parenthesis, after which letter by letter filing is resumed. Entries beginning with numbers which are not spelled out are filed at the end in numerical sequence.

The main entries include, when applicable, the following information derived from the work and application.

- 1) Title, followed by subtitle and/or descriptive statements. The authorship of the work is included in this statement, with the nature of authorship (if available).
- 2) Edition statement.
- 3) Country of publication for works registered as foreign or as ad interim works.
- 4) Label name and number for registered sound recordings.
- 5) Physical description of the deposit.
- 6) Series statement.

- 7) Additional titles associated with the registered work such as variant titles, alternative titles, translated titles, etc.
- 8) Notes; information is given here which serves to supplement the data that is given elsewhere in the entry in order to describe a work more accurately or identify it more explicitly.
- 9) Statement that the registered work is published in or as part of another work, or is bound with another independent work.
- 10) Names of authors given in the application which do not appear elsewhere in the entry.
- 11) Statement of those materials contained in the registered work on which copyright is not claimed, when so stated in the application.
- 12) Information contained in the application which relates to the registration of an earlier version of the work.
- 13) Brief statement of the new matter on which copyright is claimed when so stated in the application.

- 14) Copyright symbol © or ®.
- 15) A statement of limitation of claim if the application or notice on the work explicitly limits the claim.
- 16) Name of the copyright claimant.
- 17) Date of publication for published works; for unpublished works the date on which the last of all items required to complete registration (i.e., copy, application, and fee) was received in the Copyright Office.
- 18) Registration number.

For published works, whenever it is necessary to indicate a variation between the information given

in the application and in the copy of the work with respect to the claimant's name or the date of publication, the data from the application is given first, followed by the phrase "in notice" and the data given in the work; e.g., © John Doe; 11Jul76 (in notice: 1975).

Works deposited in connection with current copyright registrations may be selected for inclusion in the collections of the Library of Congress. Library of Congress printed cards are available for many of the published works so selected. Orders for such cards or inquiries concerning them should be addressed to the Catalog Distribution Service Division, Building No. 159, Navy Yard Annex, Washington, D.C. 20541.
